

LABORATORY REPORTS

Certificates of Analysis

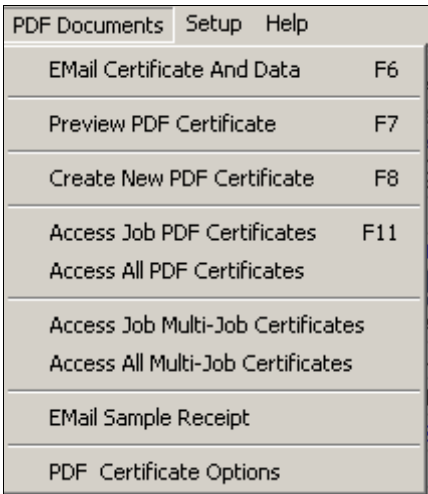

An un-limited number of report formats may be established for use in creates of laboratory Certificates using the built-in Lims1 Report Format Generator. By default a Certificate Format is linked to a Job Registrations depending of the system Setup Tables - Sample Type selected for use, however a new style of report may be selected at any time.

Certificates may be directly printed or created as pdf documents and automatically linked to emails for distribution to clients.

Lims1 Documentation Library

All Certificate are stored in the Lims1 Documentation Library for future reference. This includes any revisions to certificates which may be created (each Certificate - pdf file name includes a Revision No.

The PDF Documents Menu (shown below) provides a range of options for both creating Certificates and accessing stored documents.

Access Job PDF Certificates

On selection this menu item a listing of all Certificate (revisions) is displayed in the PDF Documents List. The document may then be printed or previewed.
